COOLING TOWEL HANG TAG LIGHT, SOFT AND FUNCTIONAL

No Bulk

The colorful mesh material is silky, soft, and easily folds and fits into its own small bag making it very convenient for climbing, bike riding, golfing or any other sports.

Soak – Swivel - Snap

Stay Chilled by just soaking the towel, swivel to release access water, snap and wrap or simply wipe off for quick relief

Sweat and Glow

When the water evaporates you cool down, no matter what activity or journey you are on your towel allows you to chill instantly.

Natural Therapy

A traditional natural approach. The Cooling Towel theory is that the cold feet and ankles stimulate an increase in circulation and an increased response from the immune system.

The result is that the body expends heat and ends up drying the towel and cooling the body. This treatment can relieve chest congestion as well.

Electronic Air-Condition

Keeps your electronics cooled down in hot temperatures.

1. Soak

2. Swivel

3. Snap
